Aizaz Choudhary

Web Designer | SEO, Product Research, WordPress
Gujrat District, Punjab, Pakistan

Summary

I am a web designer with over four years of experience in creating and improving websites for various clients and businesses. I have expertise in responsive web design, search engine optimization, user interface design, and e-commerce platforms such as Shopify and WordPress.

I created over 200 Shopify stores that boosted the daily sales and revenue of their owners. I delivered customized and attractive websites that met the clients' needs and expectations, using my skills in HTML, CSS, JavaScript, and PHP. I also optimized the websites for SEO, ensuring that they ranked high on Google and other search engines, and increased the traffic and conversions.

I am currently pursuing a bachelor's degree in software engineering at the University of Gujrat, where I am learning the fundamentals of programming, web development, database management, and software testing. I am passionate about enhancing my skills and knowledge in this field, and I am eager to apply them to real-world projects and challenges. My goal is to become a proficient and innovative web developer who can create and improve web applications that solve problems and create value.
